Release Notes v. 2023.2*

What we've fixed

We fixed the bugs below to make your CAD experience better.

Order downloading
Orders can now be downloaded from 3Shape Communicate in Inbox.

Chinese language
The DWOS interface is now available in Chinese.

Order Management
Virtual waxups are calculated more quickly than ever.

Save vertical axis adjustment
Replace scan files in the scan import station and save the model's vertical axis adjustment.

Scan import station
Save scan files when replacing with other scan files in the scan import station.

What we've improved

We're doing our best to improve DWOS every day.

Increased post design height
Abutment post designs now have a prescribed height of at least 4 mm.

Increased security
On systems running Windows 7 the cryptographic TLS protocol has been updated to increase protection against cybersecurity threats.

----
*This version is compatible with Dental Wings standalone software licenses and the following lab scanners: 7Series, 3Series, and Medit T500, T310, T510, and T710.
